CONTENTS OF VOLUME 52, 1993

(All rights reserved)

	PAGES
Plenary Lectures *(Symposium Proceedings: 15–19 July 1992)*	
Chronic malnutrition: protein metabolism. *A. A. Jackson*	1–10
Chronic undernutrition and the young. *E. Ocloo*	11–17
Chronic undernutrition in pregnancy and lactation. *Jane A. Kusin, Sri Kardjati & U. H. Renqvist*	19–28
Chronic undernutrition and the aged. *Marianne Schroll, Lillian Jørgensen, Merete Osler & Michael Davidsen*	29–37
Undernutrition and chronic disease: cancer. *David Kritchevsky*	39–47
Comparative Aspects of Growth Regulation *(Symposium Proceedings 15–19 July 1992)*	
Micronutrients and longitudinal growth. *Nigel Loveridge*	49–55
Postnatal growth of gut and muscle: competitors or collaborators. *P. J. Reeds, D. G. Burrin, T. A. Davis & M. L. Fiorotto*	57–67
Energy partitioning, tissue growth and appetite control. *A. J. F. Webster*	69–76
Nutrition and Immunity in Serious Illness *(Symposium Proceedings 15–19 July 1992)*	
Nutrition and the immune system. *Ranjit Kumar Chandra*	77–84
The immunological effects of trauma. *T. W. J. Lennard & D. A. Browell*	85–90
The effects of lipids on some aspects of the cellular immune response. *Pierre J. Guillou*	91–100
Parasitism and Protein and Energy Metabolism in Man and Animals *(Symposium Proceedings 15–19 July 1992)*	
The impact of gastrointestinal parasites on protein–energy malnutrition in man. *P. G. Lunn & C. A. Northrop-Clewes*	101–111
Interactions between parasites and animal nutrition: the veterinary consequences. *Peter H. Holmes*	113–120
Metabolic consequences of intestinal parasitism. *John C. MacRae*	121–130
Functional Significance of Micronutrient Undernutrition *(Symposium Proceedings 15–19 July 1992)*	
The role of zinc and vitamin A deficiency in diarrhoeal syndromes in developing countries. *Andrew Tomkins, Ron Behrens & Swapan Roy*	131–142
Vitamin undernutrition. *C. J. Bates*	143–154
Micronutrient undernutrition in British schoolchildren. *Susan Southon, Angela L. Bailey, A. J. A. Wright, Joanne Belsten & P. M. Finglas*	155–163
Iron, infection and immune function. *Chaim Hershko*	165–174

Chronic Undernutrition: How Can Nutritionists Help? *(Symposium Proceedings 15–19 July 1992)*

Aid programmes for malnutrition and the role of the nutritionist. *John Seaman* 175–182
Nutrition and health in the developing world: the Caribbean experience. *Knox E. Hagley* 183–187

Behavioural Consequences of Undernutrition *(Symposium Proceedings 15–19 July 1992)*

Malnutrition, Learning and Behaviour: 25 years on from the MIT Symposium. *James L. Smart* 189–199
Some aspects of the long-term effects of malnutrition on the behaviour of children in the Third World. *J. Paget Stanfield* 201–210
Causes and consequences of dieting and anorexia. *Andrew J. Hill* 211–218
The behavioural effects of undernutrition in confined farm animals. *Alistair B. Lawrence, E. M. Claudia Terlouw & Ilias Kyriazakis* 219–229

Alzheimer's Disease and Dietary Aluminium *(Satellite Symposium 15–19 July 1992)*

The bioavailability and metabolism of aluminium compounds in man. *Nicholas D. Priest* 231–240
The chemistry of aluminium in the gastrointestinal lumen and its uptake and absorption. *J. J. Powell & R. P. H. Thompson* 241–253
Recent research on the causes of Alzheimer's disease. *M. J. Rowan* 255–262

TFOM Workshop Reports *(Symposium Proceedings 15–19 July 1992)*

Nutrition information. Ann Burgess 263–264
Nutrition and migration: people on the move. *Elizabeth Dowler & Claudia McConnell* 265–266

The Nestlé Lecture *(Symposium Proceedings 15–19 July 1992)*

Chronic undernutrition and metabolic adaptation. *P. S. Shetty* 267–284

Perinatal Nutrition *(Symposium Proceedings 12 September 1992)*

Micronutrient deficiencies in the preterm neonate. *H. J. Powers* 285–291

The Digestive Tract in Nutritional Adaptation *(Symposium Proceedings 9–11 September 1992)*

Genetic regulation of enterocyte differentiation. *M. W. Smith* 293–300
Molecular aspects of enzyme synthesis in the exocrine pancreas with emphasis on development and nutritional regulation. *I. le Huerou-Luron, E. Lhoste, C. Wicker-Planquart, N. Dakka, R. Toullec, T. Corring, P. Guilloteau & A. Puigserver* 301–313
Dietary regulation of intestinal nutrient carriers. *B. H. Hirst* 315–324

Influence of the weaning diet on the changes of glucose metabolism and of insulin sensitivity. *J. Girard, T. Issad, J. Maury, F. Foufelle, C. Postic, A. Leturque & P. Ferre* 325–333
Nutritional supply of proteins and absorption of their hydrolysis products: consequences on metabolism. *A. A. Rérat* 335–344
Manipulation of the gut microflora: experimental approach in animals. *G. Fonty, P. Raibaud & Ph. Gouet* 345–356
Manipulation of the human gut microflora. *J. C. Rambaud, Y. Bouhnik, P. Marteau & P. Pochart* 357–366
Factors affecting fermentation reactions in the large bowel. *G. T. MacFarlane & S. MacFarlane* 367–373
Interactions between nutrition and the intestinal microflora. *C. Edwards* 375–382

Obituary Notice

Obituary Notice, R. A. McCance (1898–1993). *Elsie M. Widdowson* 383–386

The Sir David Cuthbertson Medal Lecture 1992 *(2/3 December 1992)*

The immunological and metabolic effects of L-arginine in human cancer. *Kenneth G. M. Park* 387–401

Fish and Nutrition *(Symposium Proceedings 7/8 April 1993*

Some aspects of the biology of feeding and growth in fish. *Clive Talbot* 403–416
Nutritional requirements of fish. *Colin B. Cowey & C. Young Cho* 417–426
Variation in individual food consumption rates of fish and its implication for the study of fish nutrition and physiology. *Ian D. McCarthy, Dominic F. Houlihan, Chris G. Carter & Katerina Moutou* 427–436
Epidemiological aspects of fish in the diet. *Daan Kromhout* 437–439
Variability of the composition of fish oils: significance for the diet. *Colin F. Moffat & Alister S. McGill* 441–456
Marine oils: metabolic effects and role in human nutrition. *T. A. B. Sanders* 457–472

ABSTRACTS OF COMMUNICATIONS

15–19 July 1992

Faecal losses of retinol and α-tocopherol in subjects with cystic fibrosis and healthy controls. *Penny J. Halford & A. A. Jackson* 2A
Causes of weight loss in Human Immunodeficiency Virus infection. *C. Summerbell, J. Perrett & B. Gazzard* 3A
Oxygen consumption during the acute phase of burn injury in infants and children. *Charmaine Childs* 4A
Adipose tissue profiles in inflammatory bowel disease. *B. Corridan, R. Collins, C. O'Morain & M. J. Gibney* 5A
Resting energy expenditure with the ventilated hood and mouthpiece systems in patients with chronic lung disease. *M. K. Sridhar, R. Carter, J. J. Reilly, S. W. Banham & M. E. J. Lean* 6A

The metabolism of amino acids in mice infected with *Schistosoma mansoni*. *David A. Bender & Eliud N. M. Njagi* 7A
A follow-up study to investigate an increase in *Giardia lamblia* infection among Bangladeshi children receiving regular anthelmintic treatment. *E. K. Rousham* 8A
The intensity of infection with *Ascaris lumbricoides* and the anthropometric status of children in Bangladesh. *Andrew Hall* 9A
Phospholipid-2-9,12,15-linolenic acid in Gambian children with *Plasmodium falciparum* malaria. *J. M. Knowles, D. I. Thurnham, A. V. S. Hill, B. M. Greenwood & C. M. Tang* 10A
Eating habits, nutrient intake and growth in pre-school children. *J. A. Payne, N. R. Belton & T. R. Kirk* 11A
Fruit and vegetable consumption in north Glasgow: some results from the MONICA study of 1986 and 1989. *W. L. Wrieden, C. Bolton-Smith, C. A. Brown & H. Tunstall-Pedoe* 12A
A preliminary report on dietary intake and anthropometry of vegetarian children compared with omnivores. *I. Nathan, S. Kirby & A. Hackett* 13A
Traditional dietary intakes and serum lipids in Singapore ethnic groups. *N. Saha, P. Y. Tan, S. P. Sothy, T. B. Ng & C. H. Lim* 14A
Persuasive power of nutritional messages enhanced by positive and non-technical language. *M. C. Murphy, A. Wise & A. McLeish* 15A
Food sources of fat and sugar in the Northern Irish diet. *M. E. Barker & K. A. Thompson* 16A
Ireland: a comparison of food and nutrient trends in the national surveys. *Mary Moloney* 17A
Maternal diet and social class in the East End of London. *W. Doyle & M. A. Crawford* 18A
The plate model for dietary education. *J. Armstrong & M. E. J. Lean* 19A
How effective is healthy eating advice for women from different socio-economic groups? *Mary A. T. Flynn, Mary B. Codd, Michael J. Gibney & Declan D. Sugrue* 20A
Effect of myofibrillar muscle proteins on *in vitro* biolysability of iron. *F. M. Kirwan, I. O'Connor, P. A. Morrissey & A. Flynn* 21A
Effect of tannic acid on iron and zinc absorption from a model food system in sucking rats. *K. Cashman & A. Flynn* 22A
The effect of dietary fibres on iron and zinc absorption in sucking rats. *M. Harrington & A. Flynn* 23A
Assessment of exchangeable pools of zinc using the stable isotope ^{70}Zn. *M. J. Jackson, Susan J. Fairweather-Tait, T. E. Fox, S. Gabrielle Wharf, J. Eagles & P. C. Croghan* 24A
Zinc supplementation in young Gambian children. *P. H. Evans, C. J. Bates, P. G. Lunn, C. A. Northrop-Clewes, S. Hoare, T. J. Cole & P. J. Aggett* 25A
Effects of dietary lactose and sucrose on antioxidant status in copper-deficient diabetic rats. *B. M. McDermott, J. J. Strain, K. J. McAdam & P. R. Flatt* 26A
The effect of dietary copper deficiency on endothelium-dependent relaxation of rat aorta *in vitro*. *D. P. Megaw, J. M. Allen & J. J. Strain* 27A
Immunological function in copper deficiency. *K. K. Tong, D. P. Megaw, J. M. Allen, J. J. Strain & B. M. Hannigan* 28A

Effect of changes in environmental temperature on self-selection of ascorbic acid in coloured feeds by broiler chicks. *H. R. Kutlu & J. M. Forbes* 29A
Cholecystokinin octapeptide suppresses feeding and conditions colour aversion in chickens. *M. Covasa & J. M. Forbes* 30A
Poorer cognitive performance associated with dieting and high levels of dietary restraint. *Michael W. Green & Peter J. Rogers* 31A
The acute effects of lunches of differing fat and carbohydrate content on mood and cognitive performance. *Helen M. Lloyd, Michael W. Green, Peter J. Rogers & David J. Mela & Ann F. Walker* 32A
Effect of chronic energy deprivation on 24 h activity of lean and obese mice. *C. M. Murphy & J. F. Andrews* 33A
Food behaviour evolution in anorexia nervosa. *G. Morande, M. Montenegro, P. Varela & A. Marcos* 34A
The effect of covert manipulation of dietary fat and energy density on *ad lib.* food intake in humans. *R. J. Stubbs, P. R. Murgatroyd, G. R. Goldberg & A. M. Prentice* 35A
Behaviour of stunted children and the relationship to development. *J. M. Meeks Gardner, S. M. Grantham-McGregor, S. M. Chang & J. H. Himes* 36A
The effect of meal size on the cardiovascular responses to food ingestion. *M. B. Sidery & I. A. Macdonald* 37A
Glucagon-like peptide-$1_{(7-36)}$ amide and glucose-dependent insulinotropic polypeptide in the hyperinsulinaemia of obese hyperglycaemic (*ob/ob*) mice. *J. M. E. Knapper, C. J. Bailey & P. R. Flatt* 38A
Postprandial lipid and lipoprotein response to a fish-oil test meal. *E. Daly & M. J. Gibney* 39A
Lunchtime dietary choice of young teenagers in Tayside. *Wendy L. Wrieden* 40A
The effect of non-starch polysaccharide on bacterial contribution to faecal mass. *A. J. Costello, J. L. Murphy & S. A. Wootton* 41A
Modest-but-adequate food budgets for five household types. *M. Nelson & A. B. Mayer* 42A
Hepatic drug-metabolizing enzymes in spontaneously obese hyperglycaemic (*ob/ob*) mice. *C. R. Barnett, P. R. Flatt, C. J. Bailey & C. Ioannides* 43A
Dietary factors and vertebral bone density in perimenopausal women from a general medical practice in Northern Ireland. *J. Eaton-Evans, E. M. McIlrath, W. E. Jackson, P. Bradley & J. J. Strain* 44A
Raised metabolic demands for energy may contribute to weight loss in institutionalized psychogeriatric patients. *R. M. Sutherland & S. A. Wootton* 45A
Assessment of nutritional status of hospitalized general surgical patients in Ibadan, Nigeria. *O. O. Keshinro, J. C. O. Omoko, P. U. Egele & A. M. Laoye* 46A
Linoleic and α-linolenic acid oxidation during undernutrition: are they important in energy metabolism? *S. C. Cunnane, Z.-Y. Chen & J. Yang* 47A
The importance of dietary fat in maintaining energy balance in a rural subsistence farming community. *B. J. Sonko, A. M. Prentice, A. A. Paul, A. Prentice, Y. Schutz, E. Jequier & R. G. Whitehead* 48A
The effect of dietary fatty acid composition on mRNA for lipoprotein lipase in the rat. *M. C. Murphy, S. M. Puddicombe, L. M. Morgan & C. M. Williams* 49A

Effect of heat treatment and enzyme supplementation of barley-based diets on performance of broiler chicks. *K. J. McCracken, R. Urquhart & M. R. Bedford* 50A

Basal and hormone-stimulated rates of lipogenesis in liver and adipose tissue of rats fed on corn oil and fish oil diets. *C. M. Williams, J. M. Beety, A. Zampelas, N. Furlonger & L. Morgan* 51A

Effects of triacylglycerol structure on postprandial chylomicron triacylglycerol clearance. *A. Zampelas, N. Furlonger, L. M. Morgan, P. Quinlan, J. Wright & C. M. Williams* 52A

The relationship between changes in metabolic rate, haemodynamic variables and plasma catecholamine levels during acute starvation. *J. Webber & I. A. Macdonald* 53A

Cholesterol oxidation in porcine muscle as influenced by pig diet. *F. J. Monahan, J. I. Gray, D. J. Buckley & P. A. Morrissey* 54A

The effect of triacylglycerols on lymphocyte proliferation. *Philip C. Calder & Eric A. Newsholme* 55A

The influence of acetate and nutrient balance on ouabain-sensitive respiration in ovine liver. *N. S. Jessop & R. A. Leng* 56A

Phytase activity in wheat bran subjected to simulated gastric digestion. *J. H. Mitchell & A. Wise* 57A

Vitamin A levels in a sample of Irish animal livers. *Yvonne E. Finnegan, M. Russell & P. M. Mathias* 58A

A conceptual approach to the determination of upper safe limits for the consumption of micronutrients. *D. H. Shrimpton* 59A

Effects of iodine and retinol supplementation on thyroid function in pre-school children in the Morogoro Region of Tanzania. *M. J. Cresswell, T. C. Chan, J. J. Strain, N. C. Rollins, J. A. Dodge, F. Mhando & K. Mtebe* 60A

Relationships between plasma, gastric tissue and gastric juice ascorbic acid levels in subjects with and without gastritis. *A. J. Waring, C. J. Schorah, G. M. Sobala & D. Lynch* 61A

Antioxidant protection of the anoxic–reoxygenated heart. *S. O'Farrell & M. J. Jackson* 62A

The validation of a food frequency and amount questionnaire for assessing dietary antioxidant intakes amongst older adults. *C. M. O'Brien & M. Nelson* 63A

Influence of illness on serum retinol of children in northern Ghana. *S. M. Filteau, S. Morris, R. A. Abbott, A. M. Tomkins, B. Kirkwood, P. Arthur, D. Ross, J. Gyapong & J. Raynes* 64A

Risk factors for intra-uterine growth retardation in Campinas, Brazil. *Patricia Rondo & Andrew Tomkins* 65A

Effects of potassium depletion and repletion on growth and resting energy expenditure in the growing rat. *R. Hailwood, A. Jones & S. S. Wootton* 66A

Effects of a 4-week dietary fat feeding trial on the metabolic responses to tumour necrosis factor α in rats. *Hilda Mulrooney & R. F. Grimble* 67A

Modulation of the response of rats to endotoxin by butter, olive oil and corn oil. *H. T. Besler & R. F. Grimble* 68A

Effects of glutamine feeding on plasma and muscle glutamine levels and on glutamine synthetase activity and glutamine release in the rat. *Elizabeth Opara, Mark Parry-Billings & Eric A. Newsholme* 69A

The effect of surgery and growth hormone suppression on plasma muscle and glutamine levels. *L. M. Castell, H. Powell, M. Parry-Billings & E. A. Newsholme* 70A
Increased TNF production does not correlate with cachexia in chronic inflammatory bowel disease. *M. A. O'Connell, D. G. Weir & D. Kelleher* 71A
Dietary patterns in functional and organic dyspepsia. *A. Mullan, F. Gleeson, P. O'Mahoney, T. Joy, P. Kavanagh & M. J. Gibney* 72A
Serum antioxidants and malondialdehyde in homocysteinaemics with coronary heart disease, non-homocysteinaemics with coronary heart disease, and normal control subjects. *C. M. Goss, K. M. Younger, P. Mathias & I. Graham* 73A
Effects of polymer feeds on ileal integrity as assessed by diamine oxidase release. *J. L. Engelman, Y. Qureshi, G. M. Murphy & G. E. Sladen* 74A
Effects of clenbuterol on tissue mass after scald injury in the rat. *Lucie Martineau & Roderick A. Little* 75A
Measurement of postprandial apolipoprotein B-48 using a novel specific antibody. *A. S. Peel, D. Bulsara, C. M. Williams & B. J. Gould* 76A
Plasma ascorbic acid and dehydroascorbic acid levels in very low-birth weight infants. *D. C. Wilson, J. Lightbody, I. Young, G. McClure & E. Trimble* 77A
Tyrosine metabolism in premature babies: effects of vitamin C intake. *Hilary J. Powers, Alan T. Gibson & Christopher J. Bates* 78A
Vitamin C deficiency is associated with pressure sores in elderly patients with femoral neck fractures. *Helen F. Goode & Eileen Burns* 79A
Effect of vitamin C supplementation on the peroxyl radical trapping ability (TRAP) of plasma from female smokers. *C. W. Mulholland, T. R. Trinick & J. J. Strain* 80A
Indices of lipid peroxidation in the heart of vitamin E-deficient pigs with or without supplementation with polyunsaturated fatty acids. *M. Nolan, D. G. Kennedy, W. J. Blanchflower & S. Kennedy* 81A
Stability of vitamin E-deficient muscle plasma membrane. *S. Page, A. McArdle, N. J. Prescott, R. H. T. Edwards & M. J. Jackson* 82A
Calcium homeostasis during contractile activity of vitamin E-deficient skeletal muscle. *A. McArdle, R. H. T. Edwards & M. J. Jackson* 83A
Vitamin E status modulates the inflammatory response to endotoxin in rats. *Kerry Troughton & R. F. Grimble* 84A
The effect of pregnancy on folate catabolism in the rat. *H. McNulty, J. M. McPartlin, D. G. Weir & J. M. Scott* 85A
The effect of biotin deficiency on the fatty acid composition of porcine tissues. *K. M. Cooper, D. G. Kennedy & S. Kennedy* 86A
The non-invasive measurement of protein turnover in man: comparison of end product methods with [^{15}N]glycine. *G. Grove & A. A. Jackson* 87A
Urea kinetics in healthy young women. *I. McClelland, C. Persaud & A. A. Jackson* 88A
Whole-body protein turnover and basal metabolism in chronic undernutrition. *M. J. Soares, L. S. Piers, P. S. Shetty, A. A. Jackson & J. C. Waterlow* 89A
Effects of glycine and arginine supplementation on the metabolic response to tumour necrosis factor in rats fed low-protein diets. *Emma A. L. Hunter, Tracey Meakins & R. F. Grimble* 90A

Increased albumin synthesis in healthy volunteers with feeding. *K. A. Hunter, P. E. Ballmer, S. E. Anderson, A. G. Calder, P. J. Garlick & M. A. McNurlan* 91A
Responses of chronically energy deficient tropical subjects to brief cold exposure. *M. Vaz, A. V. Kurpad, Saral Thangam, M. V. Shailesh, J. F. Andrews & P. S. Shetty* 92A
Measurement of free-living energy expenditure by continuous heart rate monitoring and doubly-labelled water. *L. Davidson, G. McNeill, P. Haggarty & J. S. Smith* 93A
The effect of season and leisure activity on the energy expenditure of adult males. *P. Haggarty, G. McNeill, M. K. Abu Manneh, L. Davidson, E. Milne, G. Duncan & J. Ashton* 94A
The naturally-occurring dietary flavonoid quercetin: *in vitro* investigation of its effects on glycolytic flux. *S. M. Cronin, N. M. O'Brien & P. A. Morrissey* 95A
Weight-for-height influences outcome in childhood leukaemia. *J. J. Reilly, I. Odame, J. McColl, P. McAllister, B. Gibson & B. A. Wharton* 96A
Reported energy intakes and basal metabolic rates of normal healthy children aged 5–15 years. *S. A. Bond & S. A. Wootton* 97A
Energy intakes and resting energy expenditure in children of short stature and those receiving growth hormone. *C. M. Smith, E. S. McCaughey, P. R. Betts, S. A. Bond, S. A. Wootton & A. A. Jackson* 98A
Supplementing meals with leaf concentrate in Sri Lankan nursery schools: impact on anthropometric status. *J. Gladwin, S. V. Rajasuriya, P. E. Soysa, D. N. Cox, J. Fraser & A. Ashworth* 99A
Effect of diet and stage of lactation on milk composition in rats. *A. P. Pine, L. A. Emsley, G. F. Allan, N. S. Jessop & J. D. Oldham* 100A
Lactose digestion in breast-fed Gambian infants. *C. A. Northrop-Clewes & P. G. Lunn* 101A
Evidence of energy-sparing adaptations in Gambian women during pregnancy, assessed by whole-body calorimetry. *S. D. Poppitt, A. M. Prentice, E. Jequier, Y. Schutz & R. G. Whitehead* 102A
Iron deficiency in Asian toddlers and the failure of progression of the weaning process. *M. B. Duggan & L. Harbottle* 103A
Perirenal adipose tissue development in artificially- and ewe-reared lambs over the first month of life. *C. J. Darby, L. Clarke, M. A. Lomax & M. E. Symonds* 104A
Nitrogen metabolism across the liver of growing steers fed a high nitrogen grass pellet diet. *Corinna J. Pippard, M. A. Lomax & D. E. Beever* 105A
The place of nutrition in the general practice consultation: a pilot study. *M. K. Patel, D. H. Radia, S. Keir, A. Goraya & J. Powell-Tuck* 106A
Does chronic undernutrition in adult Masai influence morbidity and survival? *M. J. Murray, A. B. Murray & N. J. Murray* 107A
Anthropometric measurements in elderly orthopaedic patients: 6-month follow-up of high- and low-nutritional risk groups. *M. Lumbers, L. Driver, R. J. H. Howland, M. J. Older & C. M. Williams* 108A
Factors associated with undernutrition in pre-school Tanzanian children. *A. M. Gray, J. Eaton-Evans, P. G. McKenna, J. J. Strain, N. C. Rollins, P. Kategile, T. Mosha & K. Mtebe* 109A

Nutrient intakes in a group of self-reported milk allergy subjects. *M. McGowan & M. J. Gibney* 110A
Dietary knowledge and practice of nutritional supplement users. *M. Kearney & M. J. Gibney* 111A
Comparison of energy, ascorbic acid and fibre estimates by a food-frequency questionnaire and a 10 d weighed record in smokers. *R. L. Thompson, B. M. Margetts & D. A. Wood* 112A
Cigarette smoking and intake of antioxidant vitamins: a dose-type response effect. *C. Bolton-Smith, M. Woodward, C. A. Brown & H. Tunstall-Pedoe* 113A

9–11 September 1992

Involvement of sugar composition of dietary fibre in formation of short-chain fatty acids during *in vitro* fermentation with human microflora. *V. Salvador, C. Cherbut, J. L. Barry, C. Bonnet & J. Delort-Laval* 116A
Enumeration of bacteria forming acetate from H_2 and CO_2 and other H_2-utilizing micro-organisms from the digestive tract of animals and man. *J. Doré, B. Morvan, P. Pochart, I. Goderel, F. Rieu-Lesme, G. Fonty, J.-C. Rambaud & P. Gouet* 117A
Competition for hydrogen between methanogenesis and hydrogenotrophic acetogenesis in human colonic flora studied by ^{13}C NMR. *A. Bernalier, E. Doisneau, C. Cordelet, P. Beaumatin, M. Durand & J. P. Grivet* 118A
The intestinal adaptive response of the rat to soluble non-starch polysaccharides is partially dependent on dietary fat. *J. D. Pell, J. M. Gee & I. T. Johnson* 119A
Establishment of *Bifidobacterium bifidum* in the intestine of human neonates: relationship with the bifidus-factors found in the stools. *S. Hudault, C. Bridonneau, P. Raibaud, C. Chabanet & M. F. Vial* 120A
Maintaining the patterns of human milk-induced gut microflora after supplementary feeding of beikost. *B. Kleeßen & H.-J. Zunft* 121A
Chemical characteristics of insoluble dietary fibre from sea-lettuce (*Ulva lactuca*). *D. Jegou & M. Lahaye* 122A
Starch hydrolysis in the rabbit intestine and effect on fibre degradation. *T. Gidenne & J. M. Perez* 123A
The adaptive response of the alimentary tract of the rat to soluble non-starch polysaccharide (NSP) components of oats. *E. K. Lund, S. R. R. Musk & I. T. Johnson* 124A
Growth of bifidobacteria in continuous culture. *X. Wang & G. R. Gibson* 125A
High bacterial counts in the proximal small intestine: an unexpected finding in normal cats. *K. Johnston, R. M. Batt, A. Lamport, O. Ballèvre, & E. Fern* 126A
Adaptation to high-fat diets: Effect on plasma cholecystokinin (CCK) and food intake. *S. J. French, R. Fadzlin, B. Murray, R. D. E. Rumsey & N. W. Read* 127A
Moderate exercise prior to ingestion of a high-fat meal decreases postprandial lipidaemia. *H. E. Aldred, F. D. Lockwood & A. E. Hardman* 128A
Tracer investigation of taurine metabolism in cats. *O. Ballèvre, C. Piguet, A. Staempfli, G. L. Czarnecki & K. Acheson* 129A
The chronic and acute effects of tryptophan (TRP) on hormones of the enteroinsular axis. *A. A. Ponter, B. Seve & L. M. Morgan* 130A

Differential effects of dietary proteins on protein synthesis activity in several tissues of newborn lambs. *P. Patureau Mirand, M. C. Valluy, L. Mosoni & G. Bayle* 131A
Nutritional value of lentils and effect of cooking on free amino acid tissue concentrations of growing rats. *E. Combe & M. Cvirn* 132A
Metabolic characteristics of isolated colonocytes: modulation by dietary fibre or by the colonic microflora. *C. Cherbuy, B. Darcy-Vrillon, M. T. Morel, A. Borlet, F. Blachier & P. H. Duée* 133A
Alteration by lymphokines of the epithelial function and barrier capacity of the human colon carcinoma cell line HT29-C119A. *M. Heyman, A. Hirribaren, A. L'Helgouac'h & J. F. Desjeux* 134A
Interleukin-2 and T-lymphocytes in mice fed on a legume diet. *J. Larralde, M. L. Esparza & J. A. Martinez* 135A
Antigenic soya-bean protein digestion in the dairy calf at weaning. *H. M. Tukur, J. P. Lalles & R. Toullec* 136A
Pancreas enlargement induced in rats by long-term consumption of dietary legume proteins. *G. Grant, P. M. Dorward, S. Bardocz & A. Pusztai* 137A
Use of chemical treatments to reduce antinutritional effects of tannins of salseed (*Shorea robusta*) meal in diets of broiler chickens. *S. Mahmood & R. Smithard* 138A
Effect of pea intake on bone protein synthesis and immunoreactive IGF. *J. A. Martinez, R. Marcos, M. T. Macarulla & J. Larralde* 139A
Soya-bean glycinin and ß-conglycinin resistance to digestion in the preruminant calf. *C. Mathis, J. P. Lalles, I. Caugant & R. Toullec* 140A
Effect of soya-bean trypsin inhibitors in the diet on trypsin activities in pancreatic tissue and ileal digesta and trypsin inhibitor activity in small intestinal digesta of piglets. *H. Schulze, J. Huisman, M. W. A. Verstegen & P. van Leeuwen* 141A
D-Xylose absorption test for malabsorption in tapeworm-infected sheep. *J. N. Swart, H. J. Fourie & P. C. van Scalkwyk* 142A
Antigen specificity and cross-reactivity of fifteen monoclonal antibodies against porcine pancreatic α-amylase II, and its AB and C domains. *J. Fueri, C. Fueri, G. Ferrey, J.-C. Chaix & G. Marchis-Mouren* 143A
Response of pancreatic lipase to graded levels of dietary tallow in the weaned piglet. *T. C. Reis de Souza, J. Peiniau & A. Aumaitre* 144A
Pancreatic nutritional adaptation in calves: effect of pea flour incorporation in the milk substitute. *G. Le Drean, I. Le Huerou-Luron, V. Philouze, R. Toullec & P. Guilloteau* 145A
Effects of inulin on goblet cell distribution and mucin type in the hindgut of heteroxenic rats. *J. C. Meslin, N. Fontaine & C. Andrieux* 146A
Amino acid losses in ileostomy fluid on a protein-free diet. *M. F. Fuller, A. Milne, C. I. Harris, T. M. S. Reid & R. Keenan* 147A
Analytical characterization by reverse-phase HPLC of products obtained by *in vitro* enzymic hydrolysis of whey proteins with gastric and pancreatic proteases. *T. Lengagne, T. Efstathiou, L. Roger & F. Mendy* 148A
The use of ruminal indigestible neutral detergent fibre to study intradiurnal variation of digestion and outflow of rumen dry matter (RDM) in sheep fed *ad lib.* on lucerne hay. *R. Baumont & J. Jamot* 149A

Distribution and post-prandial variations of the activity of polysaccharide-degrading enzymes in rumen micro-organisms. *C. Martin & B. Michalet-Doreau* 150A
Effect of lipid supply in the diet of cows on calcium and magnesium pools in the rumen. *A. Ferlay & M. Doreau* 151A
Short-chain fatty acids (SCFA) and colonic motility: influence on segmental motor patterns. *P. E. Squires, R. D. E. Rumsey & N. W. Read* 152A
Contribution of intestinal microflora to lysine requirements in non-ruminants. *D. Torrallardona, C. I. Harris, E. Milne & M. F. Fuller* 153A
Effect of inulin on the fermentation profile in rats associated with human flora from low-, high- and non-methane producers. *C. Andrieux, S. Lory, N. Roland & O. Szylit* 154A
Effects of colonic fermentation on respiratory gas exchanges following a glucose load in man. *P. Ritz, D. Cloarec, M. Beylot, M. Champ, B. Charbonnel, S. Normand & M. Krempf* 155A
Adaptation to two doses of lactulose by human colonic flora in continuous culture. *V. Ducros, M. Durand, P. Beaumatin, G. Hannequart, C. Cordelet, & J. P. Grivet* 156A
Phenotype modulation in butyrate-treated rat colon carcinoma cell lines. *P. Perrin, F. Vavasseur, N. Labarriere, P. Gasser, J. P. Galmiche, F. Bornet & K. Meflah* 157A
Ruminal fermentation of neutral detergent fibre and nitrogen in legume, grass and mixtures by growing steers. *B. P. Glenn* 158A
In vitro-fermentation of purified fibre from brown algae by human faecal bacteria. *C. Michel, J.-L. Barry, M. Lahaye, C. Bonnet & S. Mabeau* 159A
The effect of sucrose fatty esters on metabolism of human faecal bacteria. *R. L. Miller, N. A. Scully & C. Henderson* 160A
Esterification of oleic and arachidonic acids in mouse jejunum. *Y. Mathieu, A. Bernard & H. Carlier* 161A
Propionate presents effects similar to those of butyrate on HT29 cell growth and differentiation. *L. Gamet, D. Daviaud, C. Denis-Pouxviel, C. Remesy, J.-C. Murat & H. Paris* 162A
Rapid modulation of lactate utilization by inhibition of glycolysis in isolated hepatocytes from fed rats. *C. Morand, C. Remesy & C. Demigne* 163A
Effect of baked beans on steroid metabolism of hypercholesterolaemic pigs. *N. M. B. Costa, A. G. Low, A. F. Walker & R. W. Owen* 164A
Metabolic and endocrine changes induced by heat exposure in chickens. *P. A. Geraert, J. C. F. Padilha & S. Guillaumin* 165A
Adaptation of gastric lipase in mini-pigs fed on a high-fat diet. *M. Armand, P. Borel, P. H. Rolland, M. Senft, M. André, H. Lafont & D. Lairon* 166A
Kinetics of the adaptation of rat pancreatic hydrolases to a high-protein diet containing soya bean and fish. *E. F. Lhoste, M. Fiszlewicz, T. Tranchant, A. M. Gueugneau & T. Corring* 167A
Adaptation of the exocrine pancreas to a high-protein diet in germ-free and conventional rats. *I. Catala, M. Fiszlewicz, E. F. Lhoste & T. Corring* 168A
Pharmacological and biochemical evidence for differential expression of A- and B-subtype CCK-gastrin receptors in the calf pancreas during development. *V.*

Le Meuth, V. Philouze, M. Formal, I. Le Huerou-Luron, N. Vaysse, C. Gespach, P. Guilloteau & D. Fourmy 169A
Adult and old rats retain sensitivity for stimulation of muscle protein synthesis by amino acid. *L. Mosoni, M. L. Houlier, P. Patureau Mirand, G. Bayle & J. Grizard* 170A
Threonine dehydrogenase (*EC* 1.1.1.103) in growing pigs fed on threonine-deficient diets: effect of glutamic acid or protein addition. *N. Le Floc'h, B. Sève & Y. Henry* 171A
Bioavailability and pharmacokinetics of synthetic lysine (LYS) and methionine (MET) in pigs. *J. van der Meulen, J. G. M. Bakker & L. P. Jager* 172A
Effect of dietary methionine concentration on plasma free amino acid levels in genetically lean and fat chickens. *A. M. Chagneau, T. Cochard, S. Hamzaoui, M. Larbier & B. Leclercq* 173A
The ontogenic development of the active form of hepatic pyruvate dehydrogenase (*EC* 1.2.4.1) during the sucking–weaning transition. *L. S. R. Blann & K. Snell* 174A
Simulation of the effects of diet on the contribution of rumen protozoa to degradation of fibre in the rumen. *J. Dijkstra & S. Tamminga* 175A
Ribosomal DNA-targeted hybridization probes for the detection, identification and quantitation of anaerobic rumen fungi. *J. Doré, A. G. Brownlee, L. Millet, I. Virlogeux, M. Saigne, G. Fonty & P. Gouet* 176A
Permanent rumen fistulas in the thoracic region in calves. *G. Berra, M. C. Antognoli, A. Maggio, J. Pereira & P. Guilloteau* 177A
The behaviour of Co-EDTA- and Yt-labelled hay in the gastrointestinal tract of sheep. *J. Gasa, A de Vega, C. Castrillo, J. Balcells & J. A. Guada* 178A
Effects of phenolic acids on ruminal proteolytic bacteria. *D. Debroas & G. Blanchart* 179A
Proteins from different cultivars and varieties of lupins resistant to *in vitro* rumen digestion. *H. Tai & R. S. Bush* 180A
Rumen osmotic pressure, water flux and volatile fatty acid (VFA) absorption in sheep. *F. D. DeB. Hovell & S. López* 181A
Histological consequences of different surgical procedures for ileorectostomy in pigs. *J. Redlich, U. Hennig, J. P. Laplace, W. B. Souffrant, J. M. V. M. Mouwen & R. Berg* 182A
Colon simulation technique as an *in vitro* model to study the effects of diet on microbial production of enzymes potentially involved in colon cancer. *K. Stück & G. Breves* 183A
Measuring intestinal crypt cell proliferation by confocal microscopy. *T. C. Savidge, M. W. Smith, J. A. Walker-Smith & A. D. Phillips* 184A
Differential effects of epidermal growth factor and transforming growth factor-α on gastrointestinal epithelial cell proliferation. *R. A. Goodlad, C. Y. Lee, M. A. Ghatei, S. R. Bloom & N. A. Wright* 185A
Insulin and intestinal epithelial cell proliferation. *R. A. Goodlad, C. Y. Lee, S. G. Gilbey, M. A. Ghatei, S. R. Bloom & N. A. Wright* 186A
Molecular isolation of genes expressed in the differentiated epithelium of the pig small intestine. *G. Perozzi, D. Barila, C. Murgia, R. Begbie, T. P. King & D. Kelly* 187A

The effect of pattern of nutrient supply during lamb growth on the digestive tract proportions. *T. Manso, A. R. Mantecón, M. A. Chaso, P. Lavin & T. Castro* 188A

Developmental changes in intestinal glycoprotein glycosylation; relationship with diet changes at weaning and hormonal variations. *M. C. Biol, A. Martin, D. Ruggiero-Lopez, D. Lenoir, S. Pintori & P. Louisot* 189A

Net absorption of low molecular weight peptides by the mesenteric- and portal-drained viscera of steers. *C. J. Seal & D. S. Parker* 190A

Stimulation of calcium absorption in growing pigs treated for 2 months with porcine growth hormone (GH). *C. Colin, I. Denis, C. Lacroix, P. Camus, A. Brehier, M. Thomasset & A. Pointillart* 191A

[1-^{13}C]Leucine uptake into the portal vein of sheep receiving exogenous glucose intravascularly or intraduodenally. *F. Piccioli Cappelli, C. J. Seal & D. S. Parker* 192A

[^{15}N] and [^{14}C]glutamine fluxes across rabbit ileum in experimental bacterial diarrhoea. *S. K. Nath, P. Dechelotte, D. Darmaun, M. Gotteland, M. Rongier & J. F. Desjeux* 193A

Postnatal development of glucose and galactose metabolism in isolated pig enterocytes. *B. Posho, B. Darcy-Vrillon, M. T. Morel, F. Bernard & P. H. Duée* 194A

Diversity of membrane sialo-glycoconjugates in the developing porcine small intestine. *T. P. King, R. Begbie, R. Spencer & D. Kelly* 195A

Effect of oral administration of an oil enriched in γ-linolenic acid in platelet aggregation and lipid composition in alcoholic patients during withdrawal. *J. F. Menez, A. Meskar, C. Gerard, G. Le Menn & B. E. Leonard* 196A

Effect of progressive enrichment on monounsaturated fatty acids (MUFA) in the diet on serum lipids, lipoproteins and fatty acids in normolipidemic males. *B. Delplanque, J. L. Richard & B. Jacotot* 197A

Short-chain fatty acids (SCFA) and colonic motility: influence on propulsive motor patterns. *P. E. Squires, R. D. E. Rumsey & N. W. Read* 198A

Fats decrease gastric emptying rate and reduce post-prandial glycaemia. *P. Thouvenot, C. Latge, M-H. Laurens, G. Karcher & J. M. Antoine* 199A

Quantitative assessment of the effect of non-starch polysaccharides on nutrient absorption in the pig: use of a transit time ultrasound flow probe. *D. E. Blake, F. G. Roberts, J. W. Sissons, N. Canibe, C. L. Jones, K. E. Bach Knudsen & P. R. Ellis* 200A

The effect of dietary fibre on oro-caecal transit time in dogs. *S. Rigby, J. V. Johnson, K. Papasouliotis & T. J. Gruffydd-Jones* 201A

Breast-feeding and other prognostic factors among malnourished children admitted for diarrhoea in a Madagascar hospital. *O. Razafindrakoto, N. Ravelomanana, F. Randraimiharisoa, V. Rasoarivao, V. Ramialimanana, D. R. Rakotoarimanana, M. Razanamparany, J. Y. Mary & A. Briend* 202A

Polyamine metabolism in enterocytes isolated from newborn pigs. *H. M'Rabet-Touil, F. Blachier, L. Posho & P.-H. Duée* 203A

Nutritive value of goat's and cow's milk crude protein and ileal digestibility of their amino acids by the growing pig. *C. Février, J. Mourot, Y. Jaguelin & A. Mounier* 204A

Nutrient digestibility and energy use in growing medium breed puppies. *H. Dumon, P. Nguyen, L. Martin & A. Malek* 205A
The nutritive value of different wheat varieties for poultry. *S. P. Rose, P. S. Kettlewell, S. M. Reynolds & R. M. Watts* 206A
The effect of microbial phytase on the performance of ducks given diets with high amounts of rice bran. *D. J. Farrell & E. Martin* 207A
Dietary fibre and cell proliferation in the stomach. *R. A. Goodlad, B. Ratcliffe, C. Y. Lee & N. A. Wright* 208A
In vivo protein synthesis in the developing ruminant stomach. *D. Attaix, D. Rosolowska-Huszcz, E. Aurousseau, G. Bayle & M. Arnal* 209A
Programming of expression of disaccharidases in the neonatal small intestine: use of a xenograft model. *N. Jordan, S. Austin & L. T. Weaver* 210A
Effects of processing and feed enzymes on nutrient digestibility in diets for weaned pigs. *D. McClean, J. McEvoy & K. J. McCracken* 211A
Effect of Virginiamycin on the precaecal apparent digestibility of the major nutrients comparing a diet with high and low precaecal digestibility in pigs. *J. A. Decuypere, S. Spriet & H. K. Henderickx* 212A
Growth factors in colostrum: receptor localization and stimulation of phosphorylation in microvillar membranes of neonatal pigs. *D. Kelly, M. McFadyen, C. Morgan & T. P. King* 213A

12 September 1992

Normal pregnancy: a state of insulin resistance? Studies with the euglycaemic clamp. *K. Stanley, C. Bruce & R. Fraser* 215A
Reduced head growth from the second trimester of pregnancy to age 2 years: implication for health in adulthood. *W. M. O. Moore, R. P. Bannister, B. S. Ward, V. F. Hillier & F. N. Bamford* 216A
Does a maternal milk-free diet prevent allergy in the 'at-risk' infant? *J. A. Lovegrove, S. M. Hampton & J. B. Morgan* 217A
Neuropeptide Y is increased in appetite-regulating hypothalamic areas of lactating rats. *U. H. Malabu, A. Kilpatrick, M. Ware & G. Williams* 218A
Preventing steroid-associated gastric perforation with histamine$_2$ antagonists. *E. J. Kelly, P. C. Ng, S. L. Chatfield, K. G. Brownlee, S. J. Newell & P. R. F. Dear* 219A
Change in oesophageal pH: what does it tell us about gastro-oesophageal reflux in preterm infants? *A. J. Lyon, G. West & K. Ghaus* 220A
Selenium and glutathione peroxidase status in preterm infants in a low Se area. *B. A. Darlow, K. B. Sluis, B. A. Dolamore, S. Grant, P. M. George, N. Mogridge & C. C. Winterbourn* 221A
Retinol administration in neonates: are we giving enough? *A. P. Hughes, H. Sackey, M. C. K Chan, C. Harrison, S. M. Maxwell & N. J. Shaw* 222A
Postnatal changes in bone mineral content in preterm infants. *G. Menon, J. R. Williams, B. McLoughlin, F. Davidson, V. Morgan & N. McIntosh* 223A
The significance of *n*-3 fatty acids in fetal and neonatal development and some alternative sources. *M. Cocchi, R. C. Noble, H. Fallowfield, B. Speake & E. Turchetto* 224A

Chronic lung disease, dexamethasone and linear growth in neonates. *A. T. Gibson, R. G. Pearse & J. H. K. Wales* 225A
Blood pressure fluctuations and cerebral outcome in very low birth weight (VLBW) babies. *P. J. Powell, R. Barradell & M. J. Robinson* 226A
Modulation of the response of rats to endotoxin by butter, olive oil and corn oil. *H. T. Besler & R. F. Grimble* 227A

2/3 December 1992

Protein synthesis rates in individual tissues of critically-ill patients. *P. Essén, M. A. McNurlan, I. Tjäder, A. Sandgren, B. Blomqvist, J. Wernerman, A. G. Calder & P. J. Garlick* 230A
Short-term parenteral feeding does not mitigate the decrease in albumin synthesis rates induced by interleukin-1β or turpentine injection in the rat. *P. E. Ballmer, M. A. McNurlan, I. Grant & P. J. Garlick* 231A
The effect of nutritional status on interleukin-6 response to elective surgery. *G. E. Curtis, C. McAtear, L. Formela, A. Walsh & A. Shenkin* 232A
Metabolic features of multiple organ failure. *P. McClelland, M. Yaqoob, G. Curtis, I. A. Hashim, G. Smith, J. McLaughlin, H. Davies, S. M. Mostafa, J. M. Bone & A. Shenkin* 233A
Manipulation of glucose utilization in multiple organ failure using somatostatin. *J. Arnold, I. T. Campbell, L. J. Hipkin, S. Jenkins, E. O'Sullivan, M. Keegan, & S. Chadwick* 234A
Metabolic and hormonal effects of hyperglycaemic glucose clamping in multiple organ failure. *C. J. Green, C. J. Regan, E. O'Sullivan, S. Underhill, A. M. Clegg, D. P. M. MacLaren, L. J. Hipkin, I. A. Macdonald & I. T. Campbell* 235A
Modification of postprandial substrate balance by the addition of fat. *A. J. Griffiths, K. N. Frayn, S. M. Humphreys & M. L. Clark* 236A
Utilization of intravenous fat in the surgical newborn infants. *A. Pierro, M. O. Jones, P. Hammond, A. Nunn & D. A. Lloyd* 237A
The effect of glucose intake on substrate utilization and energy expenditure in the surgical newborn infant. *M. O. Jones, A. Pierro, P. Hammond, A. Nunn & D. A. Lloyd* 238A
Dietary compliance and changes in the nutritional status of chronic renal failure patients on conventional low-protein diet. *P. D. Hart, B. Engel, A. Edwards, K. Evans F. P. Marsh & J. Powell-Tuck* 239A
An acute-phase protein response is associated with increased resting energy expenditure in weight-losing patients with either benign or malignant pancreatic disease. *J. S. Falconer, C. E. Plester, L. Douglas, K. C. H. Fearon, J. A. Ross & D. C. Carter* 240A
Small-intestinal absorption of minerals during enteral feeding supplemented with a soya-bean polysaccharide and soya-bean oligosaccharide fibre. *S. A. Kapadia, A. H. Raimundo & D. B. A. Silk* 241A
How much energy should we prescribe for patients with chronic renal failure? *B. C. N. Ang, P. D. Hart, E. Bettany, B. Engel, F. P. Marsh & J. Powell-Tuck* 242A
Nutritional assessment in patients on home parenteral nutrition; objective measurements or clinical judgement? *N. G. Egger, C. Wright, G. L. Carlson & J. L. Shaffer* 243A

Infusion of the lithium salt of γ-linolenic acid into pancreatic cancer patients increases thymidine uptake and induces tumour necrosis factor release by peripheral blood mononuclear cells. *J. S. Falconer, J. A. Ross, K. C. H. Fearon, M. G. O'Riordain & D. C. Carter* 244A

Antimicrobial activity and long-term use of Taurolin as an additive to parenteral nutrition. *D. A. Johnston, G. Phillips, J. Richards & C. R. Pennington* 245A

Patterns of weight change in stage IV HIV infection. *Derek C. MacAllan, Carole Noble, Christine Baldwin & George E. Griffin* 246A

The recovery of labelled carbon dioxide in pregnant subjects. *B. G. Cooper, D. Reaich, O. S. Olufemi & R. Taylor* 247A

Estimation of the mass and distribution of body water in surgical patients by multiple-frequency bioelectrical impedance analysis. *K. C. H. Fearon, W. J. Hannan, S. J. Cowan, C. Plester, J. S. Falconer, R. A. Richardson & O. J. Garden* 248A

Metabolic effects of 3 h infusion of dopamine at 2 μg and 5 μg/min per kg. *C. J. Green, R. Sarginson, R. Duckworth, I. T. Campbell & P. Maycock* 249A

Non-linear incorporation of tracer into non-albumin plasma protein as a result of a flooding dose of leucine. *K. Smith, S. Downie, P. W. Watt, C. M. Scrimgeour & M. J. Rennie* 250A

The changes in body weight and in body composition, estimated using bioelectrical impedance analysis over 72 h of fasting; comparison with estimates based on energy expenditure measured by indirect calorimetry. *J. Webber & I. A. Macdonald* 251A

Long-chain triacylglycerol malabsorption and pancreatic function in children with protein–energy malnutrition complicating severe liver disease. *S. Beath, I. Hooley, K. Willis, S. Johnson, D. Kelly & I. Booth* 252A

Superior absorption of medium-chain triacylglycerols compared with conventional dietary long-chain fats in children with chronic liver disease. *S. Beath, T. Johnson, K. Willis, I. Hooley, G. Brown, I. Booth & D. Kelly* 253A

Metabolic and inflammatory changes following laparoscopic cholecystectomy. *M. S. R. Jakeways, V. Mitchell, I. A. Hashim, S. J. D. Chadwick, J. Anderson, F. Carli & A. Shenkin* 254A

Human growth hormone improves body-weight but not disease activity in a chronic model of colitis. *C. D. Weir, N. H. Anderson, M. McCaigue, M. I. Halliday & B. J. Rowlands* 255A

Changes in short-chain fatty acids in experimental colitis. *C. D. Weir, L. T. McGrath, N. H. Anderson & B. J. Rowlands* 256A

The correction of metabolic acidosis in chronic renal failure reduces whole-body protein breakdown and amino acid oxidation. *D. Reaich, T. H. J. Goodship & S. Channon* 257A

Collagen synthesis in human bone measured using stable isotope-labelled alanine and proline. *C. M. Scrimgeour, S. Downie, P. K. Rickuss & M. J. Rennie* 258A

The effect of enteral glutamine deprivation on rat gut mucosa during a systemic injury response. *Monica Wusteman, Nicola Jordan, Helen Tate, Lawrence Weaver, Steve Austin & Marinos Elia* 259A

15–19 July 1992

Undernutrition in drug addicts. Immunological study. *A. Marcos, P. Varela, A. Casco, I. Santacruz & A. Requejo* 261A

7/8 April 1993

Response of secondary hair follicles of the Cashmere goat to prolactin *in vitro*. *M. Ibraheem, H. Galbraith, J. R. Scaife & S. Ewen* 263A
Factors affecting the freezing point depression of milk 2. *H. M. Mohammedi, M. N. I. Barclay & P. C. Thomas* 264A
Blood acid-base and urinary excretion during chronic ingestion of a drink with acute alkalizing properties. *J. B. Leiper & R. J. Maughan* 265A
The effect of consuming the sodium salts of two weak organic acids for 5 consecutive days on acid-base status in man. *D. Ball & R. J. Maughan* 266A
The effect of dietary lipid manipulation on food intake, weight gain and tissue weights of rats. *P. Yaqoob, E. J. Sherrington, E. A. Newsholme & P. C. Calder* 267A
The effect of dietary lipid manipulation on serum lipid concentrations and fatty acid composition. *P. Yaqoob, E. J. Sherrington, D. J. Harvey, E. A. Newsholme & P. C. Calder* 268A
Fish oil supplementation changes membrane fluidity and phospholipid profiles in humans. *E. K. Lund, C. A. Farleigh, S. Ladha, L. J. Harvey & I. T. Johnson* 269A
Fish consumption in North Glasgow: results from the MONICA studies of 1986 and 1989. *W. L. Wrieden, C. Bolton-Smith, C. A. Brown & H. Tunstall-Pedoe* 270A
Contribution of selenium content of fish on dietary intake. *M. N. I. Barclay & A. MacPherson* 271A

12–15 July 1993

Calcium absorption from cow's milk and soya milks in young rats. *K. Cashman & A. Flynn* 273A
In utero exposure to maternal low-protein diets induces hypertension in rats. *S. C. Langley & A. A. Jackson* 274A
The digestibility of macronutrients in the growing domestic cat. *H. S. Munday & B. K. Lowe* 275A
Effect of hypothyroidism on insulin-like growth factor (IGF-1) status in the postnatal lamb. *J. J. Gate, C. J. Darby, M. A. Lomax & M. E. Symonds* 276A
Endogenous purine and pyrimidine derivative excretion in pregnant sows. *S. M. Martin, J. Balcells, J. A. Guada & C. Castrillo* 277A
Unilateral intramammary infusion of GH does not support a local galactopoietic action of growth hormone in goats. *K. Sejrsen & C. H. Knight* 278A
Energy cost of activity in normal weight and obese women. *J. M. Hibbert, L. D. Broemeling, J. N. Isenberg & R. R. Wolfe* 279A
Low carbohydrate oxidation during rest: a possible mediator of weight loss in the profoundly inactive? *A. P. M. McKenna, P. R. Murgatroyd, G. R. Goldberg & A. M. Prentice* 280A
The metabolic effects of acute hyperketonaemia on whole body and forearm glucose disposal. *J. Webber, E. Simpson, H. Parkin & I. A. Macdonald* 281A

Dietary fat utilization by the exercising forearm. *K. N. Frayn, A. J. Griffiths, S. M. Humphreys & M. L. Clark* 282A
The effect of test meal fatty acid composition on postprandial triacylglycerol and lipoprotein lipase responses in normal subjects. *A. Zampelas, A. S. Peel, M. C. Murphy, J. M. E. Knapper, J. Wright, L. M. Morgan, R. J. Howland & C. M. Williams* 283A
Influence of the intensity of prior exercise on postprandial lipaemia in man. *R. A. Burnett, H. E. Aldred & A. E. Hardman* 284A
Microscopical location of guar galactomannan in mid-jejunal biopsies from the pig: potential long-term immunological implications. *F. G. Roberts, A. Turvey, A. G. Low & P. R. Ellis* 285A
The use of microscopy in the evaluation of the relationship between guar galactomannan and starch in guar wheat bread: subsequent physiological implications in the pig. *C. S. Brennan, F. G. Roberts, A. G. Low & P. R. Ellis* 286A
The effect of dietary lipid manipulation on the natural killer cell activity of rat lymphocytes. *P. Yaqoob, E. J. Sherrington, E. A. Newsholme & P. C. Calder* 287A
Effect of the addition of guar gum to an acute test meal on post-prandial lipaemia in healthy young adults. *J. A. Lovegrove, L. M. Morgan, S. G. Isherwood & C. M. Williams* 288A
Measurement of apolipoprotein B-48 with a novel specific antibody reveals two postprandial peaks of intestinal origin. *A. S. Peel, A. Zampelas, B. J. Gould, E. Ah-Sing, J. C. Chakraborty, R. J. Howland & C. M. Williams* 289A
Central and peripheral cardiovascular responses to meals of different composition measured over a 3 h period. *M. B. Sidery & I. A. Macdonald* 290A
Modest *in utero* protein restriction modulates responses to endotoxin in seven week old rats fed standard chow. *S. C. Langley, M. Seakins, R. F. Grimble & A. A. Jackson* 291A
The respective roles of gastric distension and intestinal nutrients in the induction of post-prandial sensations. *M. I. Khan, C. Feinle & N. W. Read* 292A
The potential value of *Bacillus stearothermophilus* spores as a gut transit time marker. *J. C. Mathers & S. Carter* 293A
Digestibility in Labrador Retrievers during growth. *M. S. Gilham, D. Booles, J. V. Johnson & V. Legrand-Defretin* 294A
The effect of increased ammonia supply on post-prandial hepatic metabolism in growing steers fed either forage or cereal-based diets. *S. A. Maltby, L. A. Crompton, M. A. Lomax, D. E. Beever & C. J. Pippard* 295A
Adaptation to a diet by cats and dogs: implications for protocol design. *H. M. R. Nott, S. R. Rigby, J. V. Johnson & S. J. Bailey* 296A
Effects of overfeeding on protein-energy metabolism and body composition of high genetic potential boars. *R. Urquhart, J. McEvoy & K. J. McCracken* 297A
Energy restriction affects muscle fibre area and distribution selectively during growth. *A. P. Harrison, K. A. Burton & M. J. Dauncey* 298A
The energy intakes of growing canaries. *E. J. Taylor, E. Lambert & N. Moodie* 299A
Maternal manipulation of iodothyronine 5'deiodinase activity in the ovine foetus. *L. Clarke, M. A. Lomax & M. E. Symonds* 300A
The interaction between plane of nutrition and response to growth hormone on fat and protein metabolism in cattle. *J. M. Dawson, H. Greathead, D. L. Hachey, P. J. Reeds, P. J. Buttery, J. M. Pell & D. E. Beever* 301A

Urea salvage and protein synthesis during pregnancy in normal English and Jamaican women. *I. McClelland, C. Persaud, A. Badaloo, T. E. Forrester & A. A. Jackson* 302A
New analytical techniques and considerations for measuring ^{13}C-labelled amino acids at sub-micro molar levels. *E. Milne, G. J. Atkins & S. T. Brookes* 303A
The metabolic and cardiovascular responses to infused adrenaline in lean and obese subjects. *J. Webber, M. Donaldson, D. Forster, S. P. Allison & I. A. Macdonald* 304A
Does dietary protein influence resting energy expenditure? *P. J. Pacy, R. M. Quevedo, M. Cox, N. R. Gibson, G. Price & D. J. Millward* 305A
24h energy expenditure patterns in multiple organ failure. *Ceri J. Green, P. McClelland & I. T. Campbell* 306A
Energy intake and energy expenditure in acute admissions to a geriatric unit. *K. Klipstein, J. J. Reilly, J. Potter, A. Sinclair, C. A. Edwards, M. A. Roberts & K. Pietrzik* 307A
A comparison of nutrient intakes and activity levels in female aerobics instructors and beginners. *L. McKay, C. A. Brown & C. Bolton-Smith* 308A
Low intensity exercise after consumption of a high-fat meal decreases postprandial lipaemia during the recovery period. *H. E. Aldred & A. E. Hardman* 309A
Evidence that fat oxidation is modulated by fat intake in lean but not in obese women. *P. A. Volschenk, P. R. Murgatroyd, G. R. Goldberg, A. E. Black & A. M. Prentice* 310A
The use of nutritional supplements in female high exercisers. *L. McKay, C. A. Brown & C. Bolton-Smith* 311A
Between- and within-subject variability in energy expenditure during physical activity. *S. A. Wootton, S. A. Bond & S. Maki* 312A
Is the antioxidant activity of premature baby plasma modulated by plasma ascorbic acid concentrations? *K. M. Silvers, H. J. Powers & A. T. Gibson* 313A
Plasma vitamin C concentrations in critically ill patients. *C. Downing, A. Piripitsi, A. Bodenham & C. J. Schorah* 314A
Lack of concordance between two biochemical indices of vitamin B_6 nutritional status. *D. A. Bender* 315A
Antioxidant status during liver transplantation. *Helen F. Goode, Nigel R. Webster, Peter D. Howdle & Barry E. Walker* 316A
Lipid peroxidation and ultraviolet-B erythemal responses in patients consuming fish oil supplements. *S. O'Farrell, L. E. Rhodes, P. S. Friedmann & M. J. Jackson* 317A
Dietary lipids modulate the physicochemical characteristics of rat hepatocyte plasma membranes. *A. G. Clamp, R. F. Grimble, D. C. Clark, S. Ladha & E. K. Lund* 318A
Estimates of the vitamin E requirement in rats fed long-chain *n*-3 fatty acids. *Lucie Pollard & T. A. B. Sanders* 319A
Effects of feeding a riboflavin-depleted diet on the morphometry of the small intestine of the weanling rat. *E. A. Williams, R. D. E. Rumsey & H. J. Powers* 320A
Plasma vitamin E levels of dogs with retinal pigment epithelial dystrophy. *P. Watson, G. Anantharaman, J. Vuichoud & P. G. C. Bedford* 321A

Nutrient intakes and breakfast cereal consumption habits of British school-children. *S. A. Gibson & K. R. O'Sullivan* 322A
Current calcium intake and bone mineral content in young men and women. *T. J. Parsons, A. Prentice, E. S. Smith, T. J. Cole, M. A. Laskey & J. E. Compston* 323A
Factors contributing to goitre in pregnant women in Bangladesh. *S. M. Filteau, U. Anwar, Z. Rezwana, A. Johnson & A. M. Tomkins* 324A
Nutritional implications of reduced-fat (RF) food use in free-living consumers. *S. J. Gatenby, J. I. Aaron, G. M. Morton & D. J. Mela* 325A
A comparison between the nutrient content of school lunches and recommendations. *C. H. S. Ruxton, T. R. Kirk, N. R. Belton & M. A. M. Holmes* 326A
Correction for measurement error in fat intakes estimated by a food frequency questionnaire. *R. L. Thompson, B. M. Margetts & D. A. Wood* 327A
An initial assessment of food and nutrient intake for the development of a food frequency questionnaire for use in an Afrocaribbean population sample. *S. Sharma, J. E. Cade & J. K. Cruickshank* 328A
Development and evaluation of food photographs for use in retrospective dietary surveys. *P. J. Robson, M. B. E. Livingstone, E. W. A. Archer & P. G. McKenna* 329A
Development of a food frequency questionnaire. *S. A. Lanham & C. Bolton-Smith* 330A
Responses to riboflavin and multinutrient supplements by Gambian school children. *C. J. Bates, P. H. Evans & G. Allison* 331A
Plasma ubiquinone (Q_{10}) concentrations in female vegetarians and omnivores. *Kavita Prasad, Sheela Reddy & T. A. B. Sanders* 332A
An assessment of the iron status of a sample of normal, healthy, 1-year-old children. *V. E. Freeman, H. M. V. Hoey & M. J. Gibney* 333A
Antioxidant vitamin status, lipid peroxidation, and indices of nitric oxide production in patients with sepsis and secondary organ dysfunction. *Helen F. Goode, Hugh Cowley, Jack P. Leek & Nigel R. Webster* 334A
Vitamin E and polyunsaturated fatty acid intake modulate the inflammatory response to cigarette smoke. *K. L. Troughton, R. Thompson & R. F. Grimble* 335A
Modulatory effects of olive and maize oils and butter on the response of protein synthesis in liver, lung, kidney to endotoxin in rats. *H. T. Besler & R. F. Grimble* 336A
The influence of interleukin-6 (IL-6) and dietary lipids on total protein synthesis rates in cultured rat hepatocytes. *A. G. Clamp & R. F. Grimble* 337A
Relationship between antioxidant vitamins and tumour necrosis factor (TNF) in smokers and non-smokers. *P. S. Tappia, K. L. Troughton, S. Langley & R. F. Grimble* 338A
Sulphur amino acids ameliorate lung inflammation in response to tumour necrosis factor α in rats fed low-protein diets. *E. A. L. Hunter & R. F. Grimble* 339A
Effects of endotoxin on metabolic responses of rats fed with olive and maize oils and butter. *H. T. Besler & R. F. Grimble* 340A
Urea kinetics in free-living female vegetarians measured with a single-dose method. *R. Bundy, C. Persaud & A. A. Jackson* 341A

Can recorded energy intake be used to estimate energy expenditure? *M. A. Taylor & J. S. Garrow* 342A
Characteristics of people recording a low energy intake for body weight in a large national survey. *G. M. Price, A. A. Paul, T. J. Cole, W. S. Hilder & M. E. J. Wadsworth* 343A
The diet, physical activity patterns and anthropometry of a group of free-living elderly people. *C. Fraser & J. V. G. A. Durnin* 344A
Muscle thickness as an index of fat-free mass. *T. Watt, D. Withers, R. England, B. Faragher, D. F. Martin & I. T. Campbell* 345A
Prediction of body density from skinfold thickness in elderly subjects: are the existing equations valid? *J. J. Reilly, L. A. Murray, J. Wilson & J. V. G. A. Durnin* 346A
Different predictions of body fat from the same whole-body bio-electrical impedance measurement. *N. J. Fuller* 347A
The effect of covert manipulation of dietary fat and energy density on *ad libitum* food intake in "free-living" humans. *R. J. Stubbs, P. Ritz, W. A. Coward & A. M. Prentice* 348A
Changes in the diet of Mandinka women in The Gambia between 1978–79 and 1990–91: consequences for calcium intakes. *L. M. A. Jarjou, A. Prentice, Y. Sawo, S. Darboe, K. Day, A. A. Paul & S. Fairweather-Tait* 349A
The effect of the CCK receptor antagonist loxiglumide, on feeding behaviour in normal-weight volunteers. *S. J. French, A. Bergin, C. P. Sepple, N. W. Read & L. Rovati* 350A
The effect of covertly manipulating the dietary fat: carbohydrate ratio of isoenergetically dense diets on *ad lib.* food intake in "free-living" humans. *R. J. Stubbs & A. M. Prentice* 351A
The effects of dietary and intraduodenal lipid on arousal, and performance in two psychological tasks. *A. S. Wells, N. W. Read & A. Craig* 352A
The effect of subclinical parasitism with *Trichostrongylus colubriformis* on the diet selection of growing sheep. *I. Kyriazakis, D. H. Anderson, S. D. B. Cooper, J. D. Oldham, R. L. Coop & F. Jackson* 353A
Exposure to choice feeding at different ages and the subsequent choice of broiler chickens. *M. Covasa & J. M. Forbes* 354A
Substitution of low-protein for high-protein feed by broiler chickens. *J. M. Forbes & J. H. Catterall* 355A
Attitudes to fat and portion weights of fat spreads. *K. McPherson & A. Wise* 356A
Positive and negative message constructions in nutrition education. *L. McRobbie, A. Wise & A. McLeish* 357A
Acute effect of peripheral interleukin-1β administration on macronutrient selection in the rat. *H. Macdonald, S. Stamford & H. D. McCarthy* 358A
The effect in rats of intestinal intraluminal lipid on postprandial activity determined by Doppler shift radar. *B. E. Murray, K. A. Clarke & R. D. E. Rumsey* 359A
Effect of wheat bushel weight and enzyme supplementation on the apparent metabolisable energy content of diets and on broiler performance. *G. Quintin & K. J. McCracken* 360A
Protein and energy metabolism during mild zinc deficiency in adult man. *L. Thomas, B. E. Golden, M. J. Jackson, P. J. Aggett & M. A. McNurlan* 361A

The influence of dietary creatine supplementation on work output and metabolism during repeated bouts of maximal isokinetic cycling in man. *R. Birch, D. Noble & P. L. Greenhaff* 362A

Concentrations of serum cortisol, insulin and blood glucose in dairy cows fed on diets with different amounts of concentrate and roughage. *H. A. Samanc, J. A. Nikolic, Z. Damjanovic, V. Stojic, M. Andjelkovic & N. Lekic* 363A

Influence of ethyl myristate, palmitate and oleate on plasma lipoprotein metabolism in the hamster. *T. A. B. Sanders, Sanoja Sandaradura & Fenella Slattery* 364A

Methodological considerations of ^{13}C breath studies. *A. E. Jones, J. L. Murphy, S. Brookes, M. Griffiths & S. A. Wootton* 365A

The bio-availability of a ^{13}C labelled dietary fatty acid in healthy adults. *J. L. Murphy, S. Brookes, M. Griffiths & S. A. Wootton* 366A

Obesity as an adaptation to a high-fat diet: evidence from a cross-sectional study. *A. V. Astrup, B. Buemann, P. Western, S. Toubro, A. Raben & N. J. Christensen* 367A

Contribution of intestinal microflora to lysine requirements in rats. *D. Torrallardona, C. I. Harris, E. Milne, V. Ronaasen, M. E. Coates & M. F. Fuller* 368A

Hypocaloric treatment of obese type 2 diabetics. *S. Toubro, A. Astrup & F. Quaade* 369A

Faecal steroid excretion and relation to dietary intake in Indian and White vegetarians compared with white omnivores. *Sheela Reddy, T. A. B. Sanders & M. H. Thompson* 370A

The effects of psyllium on blood lipids in hypercholesterolaemic subjects. *P. Manley, C. Summerbell, A. Leeds & D. Barnes* 371A

An investigation of the effects of two indigenous African foods, *Detarium microcarpum* and *Cissus rotundifolia* on rat plasma cholesterol levels. *S. Bell, U. A. Onyechi, P. A. Judd, P. R. Ellis & S. B. Ross-Murphy* 372A

Cholesterol metabolism and crypt cell proliferation rates in rats in response to rye based diets. *E. K. Lund, K. L. Salf & I. T. Johnson* 373A

Effect of cholesterol feeding on DNA damage in hamster heart cells. *E. Turley, J. J. Strain, N. C. Armstrong, J. M. Allen & V. J. McKelvey-Martin* 374A

The effect of dietary lipid manipulation on lymphocyte proliferation. *P. Yaqoob, E. A. Newsholme & P. C. Calder* 375A

Factors influencing caecal butyrate in rats fed on raw potato starch. *J. C. Mathers & H. Smith* 376A

The effect of two Nigerian feeds containing non-starch polysaccharides on postprandial blood glucose and insulin levels in healthy subjects. *U. A. Onyechi, P. A. Judd & P. R. Ellis* 377A

The effect of two types of guar gum in solid and liquid foods on postprandial blood glucose, plasma insulin and C-peptide in obese subjects. *R. M. Fairchild, P. R. Ellis, R. M. F. Kwan, A. J. Byrne & M. A. Mir* 378A

Variations in the formulation of commercially-available oral rehydration solutions intended for use in the treatment of diarrhoea. *J. B. Leiper & R. J. Maughan* 379A

The effect of food deprivation, time of exposure and type of feed on diet selection of broiler chickens. *M. Covasa & J. M. Forbes* 380A

The effects of fibre in the breakfast upon short-term appetite control: a comparison of soluble and insoluble fibre. *H. J. Delargy, V. J. Burley, K. R. O'Sullivan, R. J. Fletcher & J. E. Blundell* 381A
Exercise-induced anorexia in lean men. *N. A. King, V. J. Burley & J. E. Blundell* 382A
The prevalence of overweight and obesity in different fat and sugar consumption groups. *C. Bolton-Smith & M. Woodward* 383A
Nutritional composition (by chemical analysis) of home-prepared weaning foods for infants. *Jane B. Morgan, Alison M. Redfern & B. Jacqueline Stordy* 384A
The nutrient contribution of weekday lunch in 7 to 8-year-old children. *C. H. S. Ruxton, T. R. Kirk, N. R. Belton & M. A. M. Holmes* 385A
Fat substitutes: their potential effect on the fat content of the diet. *H. J. Lightowler & G. J. Davies* 386A
